EURA MOBIL

Motorhomes

Preliminary equipment and technical specifications

2026/2027 season

Important information regarding vehicle weights

Since each vehicle in drive mode is only permitted to exhibit an overall weight defined by the manufacturer, weight-related specifications are particularly important when purchasing a motorhome or van. This is especially true when choosing packages and special equipment that is installed at the factory. It must be kept in mind that the overall weight permitted in road traffic may never be exceeded while driving. The information below is therefore intended to make configuring your vehicle easier and to explain the legal requirements relating to vehicle weights. Please read this information through carefully before starting your vehicle configuration process and contact your dealer if you have any questions.

1. The technically permissible overall weight

The technically permissible overall weight in a laden state can be found in the technical specifications for our motor homes and vans, as well as in the configurator. This figure represents the overall weight defined by the manufacturer that the vehicle must not exceed while driving. Otherwise, in many European countries, including Germany, fines may be issued. Since you as the driver of the vehicle are responsible for complying with the technically permissible overall weight, we recommend that you check your vehicle before every journey and weigh your vehicle before setting off.

2. Weight in ready-to-drive state

The weight in ready-to-drive state refers to the weight of the vehicle (with standard features according to the manufacturer's specifications) with its fuel tank filled to at least 90% of capacity and includes the weight of the driver (which is calculated at a nominal value of 75 kg), the weight of the fuel and fluids, the weight of the superstructure and the driver's cab, and the weight of the towing hitch and the tyre repair kit (to the extent these are present).

Information regarding the weight in the ready-to-drive state can also be found in the technical specifications for our motorhomes and vans, as well as in our configurator.

It is important to note that the weight in the ready-to-drive state is a value calculated in the type approval procedure, which is subject to legally permissible fluctuations of up to +/- 5%.

Since these fluctuations impact the remaining payload of the individual vehicle, the occurrence of legally permissible fluctuations must be factored in during the configuration and selection of packages and special equipment.

Example: In the technical specifications, the weight in the ready-to-drive state for the floor plan you have chosen is stated as 2,910 kg. This calculated value is subject to legally permissible fluctuations of +/- 5%, i.e. +/- 146 kg. The weight in the ready-to-drive state of the individual vehicle can therefore range from 2,764 kg to 3,056 kg.

We also list the legally permissible fluctuations in the technical specifications for our motorhomes and vans, as well as in our configurator as an additional text in brackets.

3. The weight of the passengers

The weight of the passengers is calculated from the number of belt-restrained seats defined by the manufacturer and is set at a nominal 75 kg per seat, whereas the weight of the driver, which was already taken into account in the weight in the ready-to-drive state, must be deducted. In the case of a vehicle with four belt-restrained seats, the weight of the passengers is therefore 225 kg (3 x 75 kg).

The number of belt-restrained seats can be found in the technical specifications for our motorhomes and vans, as well as in our configurator. Please note that these numbers represent the highest possible number of belt-restrained seats for the series-version floor plan in question. The number of belt-restrained seats can however be reduced by the selection of packages and special equipment, or it can make an increase in the vehicle's load capacity necessary.

4. The actual weight of the vehicle / packages and special equipment

The actual weight of the vehicle refers to the weight of the vehicle in the ready-to-drive state plus the packages or special equipment installed at the factory and is listed under point 13.2 of the certificate of conformity (CoC). This figure does not include the special equipment or other accessories that are / have been added by a retailer or by you personally after delivery of the vehicle from the factory.

It should be noted that the actual weight of the vehicle is also a calculated value, which may deviate from a value determined for your individual vehicle due to legally permissible fluctuations in the weight in ready-to-drive state as a calculated value of the actual vehicle weight.

Information regarding the weights of the packages and special equipment available ex works for our motorhomes and vans can be found in our configurator and in the technical specifications.

5. Payload and minimum payload

The payload is the maximum load that a vehicle can carry and is calculated by subtracting the weight in ready-to-drive state, the weight of the passengers and the weight of the packages and special equipment fitted ex works from the technically permissible overall weight.

Preliminary version

Example:

Technically permissible overall weight	3,500 kg
Weight in ready-to-drive state	- 2,910 kg
Weight of passengers	- 225 kg (3 x 75 kg)
Weight of packages / special equipment	- 100 kg
Payload=	265 kg

The installation of packages and special equipment will accordingly always lead to a reduction in the payload. The maximum weights available for packages and special equipment for each floor plan are shown separately in the technical specifications for our motorhomes and vans and in our configurator.

For motorhomes and vans as Class M1 vehicles, compliance with a minimum payload, i.e. the minimum load that a vehicle can transport, is required by law. This minimum payload must not be undercut either when configuring a vehicle or during production and is calculated for our motorhomes and vans according to the following formula:

Minimum payload in kg ≥ 10*(n + L)

Where: "**n**" is the maximum number of belt-restrained seats, plus the vehicle driver, and "L" is the total length of the vehicle in metres

Example: In the case of a motorhome with 4 belt-restrained seats and a length of 7 m, the minimum payload is 110 kg (10 x [4+7]).

It is important to note that legally permissible fluctuations in the weight in the ready-to-drive state can increase the payload of the individual vehicle, but can also reduce it.

Example: (like before):

Technically permissible overall weight	3,500 kg
Weight in ready-to-drive state (+ 4%)	- 3,026.4 kg
Weight of passengers	- 225 kg (3 x 75 kg)
Weight of packages / special equipment	- 100 kg
Payload=	148.6 kg

In order to prevent such fluctuations from leading to a shortfall in the legally prescribed minimum payload, we have limited the maximum weight for packages and special equipment on the manufacturer's side based on the legally permissible fluctuations. Information regarding this can be found in the technical specifications for our motorhomes and vans, as well as in our configurator. This data also takes into account special equipment features of country variations / special models that do not form part of the standard features.

If the configuration process for our motor homes and vans leads to the upper limit for this as defined by the manufacturer being exceeded as a result of the choice of packages and special equipment, you can only continue with the configuration process if you de-select packages, special equipment or belt-restrained seats or choose to increase the vehicle's load capacity. Otherwise, you will not be able to continue the configuration or order the configured vehicle.

In exceptional cases, despite a restriction of the weights for packages and special equipment, weighing at the end of the production line can reveal that the individual vehicle's minimum payload is undercut due to legally permissible fluctuations. In such cases, we will not ship the vehicle in question before compliance with the minimum payload is ensured through the removal of packages, special equipment or belt-restrained seats or the vehicle's load capacity is increased.

Preliminary version

Vans

Highlights: "Vancona" van

- → Elegant interior with a modern anthracite-natural wood contrast
- → Washroom with swivel shower wall
- → Table for extensive legroom – without table base
- → Table can be stored in the floor and hung up outside
- → Particularly large wall units (up to 35 cm deep)
- → Floor plans with height-adjustable beds (VV595 HB, VV635 HB)

Highlights: Van

- → Sophisticated atmosphere with high-gloss furniture
- → Interior with textile wall and ceiling covering
- → Kitchen and bathroom with mineral surfaces
- → Bathroom with swivel shower wall
- → Furniture with ambient lighting
- → Panoramic skylight roof hood
- → Efficient insulation for all-year-round use
- → Floor plans available with transverse, single and lift-up bed

Preliminary version

Vans – Feature packages

All-inclusive

PREMIUM FEATURES „MONDIAL“ AND „MONDIAL PLUS“ INCLUDED IN THE STANDARD FEATURES:

Electric parking brake
Black radiator grille
Keyless Entry & Go
"Captains chair" seats
Radio (Pioneer) incl. preparation for steering wheel controls
Rear-view camera (Zenec)
Roof - panoramic roof "Skyroof"
Manual dimming system for driver's cab (Remis)
Mosquito screen for sliding door
Midi-Heki skylight
Pre-cabling for solar power system
Bumpers painted in the vehicle colour
Black skid plate
Fog lights incl. cornering light

Steering wheel control
16" aluminium rims
Soft-touch steering wheel and gearshift knob in leather
Dashboard with chrome rings
Traction Plus incl. hill descent control
Adaptive cruise control
Wireless charging
Digital cockpit 7"
Automatic air conditioning
Solar power system (200 Watt)
Lithium battery 150 A

Mondial and Mondial "Plus" package is the same for both Van and Vancona

Driving Assistance package

Optional for: VAN "CLASSIC" and "VANCONA"

Full LED headlights
Rain and light sensor
Electrically folding exterior mirrors with de-icing feature
Blind spot assistant

Thermal package

Optional for: VAN "CLASSIC" and "VANCONA"

Electrical underfloor heating
Heated windscreen
Combi D6E heating

* Only in combination with Mondial

** Only in combination with Mondial Plus and Driving Assistance package

[1] **Technically permissible overall weight (kg)** The technically permissible overall weight in a laden state refers to the overall weight defined by the manufacturer that the vehicle may not exceed when in drive mode.

[2] **The weight in the ready-to-drive state (kg)** The weight in the ready-to-drive state refers to the weight of the vehicle (with standard features according to the manufacturer's specifications) with its fuel tank filled to at least 90% of capacity and includes the weight of the driver (which is calculated at a nominal value of 75 kg), the weight of the fuel and fluids, the weight of the superstructure and the driver's cab, and the weight of the towing hitch and the tyre repair kit (to the extent these are present). This represents a calculated value that is subject to legally permissible fluctuations of up to ± 5% (see additional text in brackets). Since these legally permissible fluctuations impact the vehicle's payload and therefore also the weights of the packages and special equipment that can be ordered, the occurrence of such fluctuations must be factored into the configuration process and the choice of packages and special equipment.

[3] **Permitted number of people with 3-point belts** The weight of the passengers is calculated at a nominal 75 kg per seat, whereas the weight of the driver, which was already taken into account in the weight in the ready-to-drive state, must be deducted. In the case of a vehicle with four belt-restrained seats, the weight of the passengers is therefore 225 kg (3 x 75 kg).

[4] **Maximum weights for packages and special equipment** The maximum weights for packages and special equipment represent a value calculated for each floor plan with which we have restricted the weights for the packages and special equipment that can be ordered from the factory. This is intended to ensure that the legally prescribed minimum payload is complied with after the vehicle is shipped from the factory. If the configuration process leads to the upper limit for this defined by the manufacturer being exceeded as a result of the choice of packages and special equipment, you can only continue with the configuration process if you de-select packages, special equipment or belt-restrained seats or choose to increase the vehicle's load capacity. Otherwise, you will not be able to continue the configuration or order the configured vehicle. Please note that the calculation of the maximum weights for packages and special equipment also takes into account the special equipment features of the selected country variation / the selected special model.

[5] **Fresh water tank size (l)** Please note that the capacity of the fresh water tank is significantly reduced in the drive position. If the payload of the individual vehicle is sufficient, it can be filled to its full capacity.

Activa One

highlights

- GRP bodywork uses bonding technology from aviation
- Floor-wall bonding technique using PU and aluminium profiles
- Up to 2,000 kg trailer load
- Continuous double floor without steps in the living area
- Rot-protected GRP chassis
- Wood-free walls with continuous insulation
- Robust furniture with aluminium profile reinforcements (3-year guarantee)
- Bonded and all-round-sealed body composite made of hail-protected glass-fibre reinforced plastic (GRP) featuring Eura Mobil Sealed Structure Technology
- 10-year leak guarantee (up to 150,000 km)
- Underfloor heating effect in the floor you walk on
- Insulated and heated coachbuilt
- "Cellar storage space" for travel equipment in the double floor
- Robust aluminium skirts
- Hail-protected walls and roof
- 37-cm high, continuous storage space in the double floor
- Winter-proof according to EN 1646
- Water tanks protected in insulated and heated double floor
- 79-cm high, heated coachbuilt with folding floor
- Storage space in the double floor can be individually divided up at the dealership
- Electric access step
- Body door with window
- Bright and modern "Beach Home" interior

- Leather steering wheel and gearshift knob
- Dashboard with techno trim design
- Moniceiver (Xzent) with rear-view camera
- Ambient lighting
- Heki skylight roof hood
- Manual dimming system for driver's cab
- Door mosquito screen
- Pre-cabling for solar power system
- Service flap at the rear
- Radio preparation incl. DAB+
- Adaptive cruise control > 30 km/h
- Fiat 160 HP engine (surcharge compared to 140 HP)
- Fiat automatic transmission in combination with a light chassis
- Automatic air conditioning
- Inductive charging station
- 7" digital instrument panel
- Naviceiver w. rear-view camera
- Carpet in the driver's cab
- Multi-function exterior socket
- External shower (cold/warm)
- External gas socket on passenger side
- Insulated curtain (all-round insulation of the driver's cab including floor insulation)
- Combi 6 E heating (surcharge compared to Combi 4 / Combi 6)
- Lithium battery 150 Ah

Optional

Fiat light and visibility package

Optional for: ACTIVA ONE

- Full LED headlights
- Rain and light sensor with high-beam recognition

Activa One – Floor plans

A ONE 650 HS

Total length:	6.50 m
Total width:	2.32 m
Weight class:	3.5 t
Number of seats:	4
Sleeping areas:	4

- Exclusively from Eura Mobil: Single bed comfort in the coachbuilt at a manageable length of 6.50 m
- Sliding door to the driver's cab
- Single beds can be converted into double bed
- Two large wardrobes under single beds
- Spacious, bright rear seating area
- Combination washroom with swivel washbasin and integrated shower
- Kitchen with 142-litre refrigerator in single arrangement
- Retractable TV pull-out at the seating group (optional)

Activa One – Technical specifications

		A ONE 650 HS
Base vehicle		**Fiat Ducato 16" / 3.5 t**
Engine model, Euro 6E, AE		103 kW (140 HP)
Chassis		Fiat CCS low-slung frame
Fuel tank	l	60 L diesel + 19 L Ad Blue
Dimensions and weights		
Double floor height	cm	37
Load volume in the double floor (double floor + rear storage space)	l	1,700
Size of storage door at the rear	cm	85 x 105
Wheelbase	m	3.80
Tyres		225/ 75R16C
Technically permissible overall weight [1]	kg	3,500 // 4,250 (optional)
Weight in ready-to-drive state [2]	kg	3,025 (2874 – 3176)
Maximum weights for packages and special equipment [4]	kg	100
Trailer load, braked*	kg	2,000 // 1,800 // 1,750 (optional)
Total length	kg	6.50
Total width	m	2.32
Overall height	m	3.15
Interior width	m	2.17
Standing height	m	1.98
Coachbuilt height	m	78
Dimensions of front side seating group	cm	-
Dimensions of rear bed	cm	200 x 140 (conversion of the seating group)
Dimensions of coachbuilt bed	cm	200 x 150 // 2 x 200 x 80
Dimensions of rear seating group/longitudinal seat bench	cm	200 x 140
Sleeping areas		4
Permitted number of people with 3-point belts [3]		4
Number of Isofix		-
Window with mosquito screen		5
Number of service flaps		3 (4) optional
Wall thickness of walls, roof, floor	mm	30 / 30 / 38
Fresh water / waste water tank size [5]	l	150/150
Fresh water tank in the drive position [5]	l	10
Battery capacity	l	80 Gel
Refrigerator	Ah	142

Number of 12 V power sockets: 1	S
21 A charger	S
USB ports: 1	S
Exterior lighting over body door	S

[1]**Technically permissible overall weight (kg)** The technically permissible overall weight in a laden state refers to the overall weight defined by the manufacturer that the vehicle may not exceed when in drive mode.

[2]**The weight in the ready-to-drive state (kg)** The weight in the ready-to-drive state refers to the weight of the vehicle (with standard features according to the manufacturer's specifications) with its fuel tank filled to at least 90% of capacity and includes the weight of the driver (which is calculated at a nominal value of 75 kg), the weight of the fuel and fluids, the weight of the superstructure and the driver's cab, and the weight of the towing hitch and the tyre repair kit (to the extent these are present). This represents a calculated value that is subject to legally permissible fluctuations of up to ± 5% (see additional text in brackets). Since these legally permissible fluctuations impact the vehicle's payload and therefore also the weights of the packages and special equipment that can be ordered, the occurrence of such fluctuations must be factored into the configuration process and the choice of packages and special equipment.

[3]**Permitted number of people with 3-point belts** The weight of the passengers is calculated at a nominal 75 kg per seat, whereas the weight of the driver, which was already taken into account in the weight in the ready-to-drive state, must be deducted. In the case of a vehicle with four belt-restrained seats, the weight of the passengers is therefore 225 kg (3 x 75 kg).

[4]**Maximum weights for packages and special equipment** The maximum weights for packages and special equipment represent a value calculated for each floor plan with which we have restricted the weights for the packages and special equipment that can be ordered from the factory. This is intended to ensure that the legally prescribed minimum payload is complied with after the vehicle is shipped from the factory. If the configuration process leads to the upper limit for this defined by the manufacturer being exceeded as a result of the choice of packages and special equipment, you can only continue with the configuration process if you de-select packages, special equipment or belt-restrained seats or choose to increase the vehicle's load capacity. Otherwise, you will not be able to continue the configuration or order the configured vehicle. Please note that the calculation of the maximum weights for packages and special equipment also takes into account the special equipment features of the selected country variation / the selected special model.

[5]**Fresh water tank size (l)** Please note that the capacity of the fresh water tank is significantly reduced in the drive position. If the payload of the individual vehicle is sufficient, it can be filled to its full capacity.

highlights

- 11-cm high heated double floor with floor storage compartments
- Elegant roof transition between driver's cab and body
- Large rear garages thanks to rear lowering with fully insulated underbody trough
- Winter-proof according to EN 1646-2
- Wood-free walls with continuous insulation (rot-proof)
- New furniture architecture in "Chalet Rustico" design (3-year guarantee)
- Bonded and all-round-sealed body composite made of hail-protected glass-fibre reinforced plastic (GRP) featuring Eura Mobil Sealed Structure Technology
- 10-year leak guarantee (up to 150,000 km)
- Water tanks heated and insulated in the double floor or in heated trough
- Electrically controlled waste water tank drainage
- Central technology compartment
- 140 HP engine, Euro 6E, Bis
- Noise-insulated window roller blinds (Seitz comfort roller blinds)
- Ambient lighting
- Illuminated entrance area with space for a TV of up to 32"
- kitchen base unit with pull-outs
- Worktop illuminated from underneath for illumination of the kitchen pull-outs
- Comfort shower with back-lit shower column (depending on floor plan)
- Shower grate in the washroom
- Single-bed floor plans with adjustable bed frame and pull-out for conversion into a double bed
- USB port for charging mobile devices
- Anchor rail for rear garage
- Seitz framed window flush with the external wall
- Body door with window and waste bin
- Mini Heki skylight over rear bed
- 16" wheels
- LED exterior lighting over body door
- 230 V power socket in washroom
- Combi 4 heating for PT 675 SB, 695 EB
- Alde hot water heating for PT 720 EB, EF
- Manual air conditioning system in the driver's cab
- Passenger airbag

Preliminary version

Variable garage
In the QF models, the the height-adjustable bed even provides space for transporting bicycles.

Couldn't be any easier
The sofas in the EF and QF floor plans can be transformed into single seats in the direction of travel – with Isofix mounts – in no time.

The elegant comfort tourer.

Modern low-profile model with double floor and extensive features. Spacious room layout with stylish, high-quality interior. Agile handling and excellent all-season characteristics.

New furniture architecture with "Chalet Rustico" interior design

↓ Example floor plan: PT 720 EF

The plus points in the interior include: Wall units in a continuous line through to the driver's cab, a large panoramic roof window, two fold-out single seats with Isofix mounts and a table with a folding top.

* Note the weight of the vehicle/trailer combination ** Numbers in brackets only in combination with 2324 "superimposed load to 3.65t" or 2311/2313 Maxi chassis

[1]Technically permissible overall weight (kg) The technically permissible overall weight in a laden state refers to the overall weight defined by the manufacturer that the vehicle may not exceed when in drive mode.

[2]The weight in the ready-to-drive state (kg) The weight in the ready-to-drive state refers to the weight of the vehicle (with standard features according to the manufacturer's specifications) with its fuel tank filled to at least 90% of capacity and includes the weight of the driver (which is calculated at a nominal value of 75 kg), the weight of the fuel and fluids, the weight of the superstructure and the driver's cab, and the weight of the towing hitch and the tyre repair kit (to the extent these are present). This represents a calculated value that is subject to legally permissible fluctuations of up to ± 5% (see additional text in brackets). Since these legally permissible fluctuations impact the vehicle's payload and therefore also the weights of the packages and special equipment that can be ordered, the occurrence of such fluctuations must be factored into the configuration process and the choice of packages and special equipment.

[3]Permitted number of people with 3-point belts The weight of the passengers is calculated at a nominal 75 kg per seat, whereas the weight of the driver, which was already taken into account in the weight in the ready-to-drive state, must be deducted. In the case of a vehicle with four belt-restrained seats, the weight of the passengers is therefore 225 kg (3 x 75 kg).

[4] **Maximum weights for packages and special equipment** The maximum weights for packages and special equipment represent a value calculated for each floor plan with which we have restricted the weights for the packages and special equipment that can be ordered from the factory. This is intended to ensure that the legally prescribed minimum payload is complied with after the vehicle is shipped from the factory. If the configuration process leads to the upper limit for this defined by the manufacturer being exceeded as a result of the choice of packages and special equipment, you can only continue with the configuration process if you de-select packages, special equipment or belt-restrained seats or choose to increase the vehicle's load capacity. Otherwise, you will not be able to continue the configuration or order the configured vehicle. Please note that the calculation of the maximum weights for packages and special equipment also takes into account the special equipment features of the selected country variation / the selected special model.

[5] **Fresh water tank size (l)** Please note that the capacity of the fresh water tank is significantly reduced in the drive position. If the payload of the individual vehicle is sufficient, it can be filled to its full capacity.

Preliminary version

Always handy
There is plenty of additional storage space in the floor hatches and storage compartments of the double floor that can be reached from the inside in a single action.

New era with the star
The modern driver's cab of the Mercedes Sprinter with innovative safety and assistance systems conveys relaxed travel comfort.

Quick loading hatch
The exterior storage compartment integrated into the body at a convenient loading height can be used for frequently used parking spot utensils in the models from 696 EB.

A true delight.

The Profila T on Mercedes Benz promises holiday enjoyment in its purest form. With great attention to detail, we have now brought our best-selling series to the highest level of perfection in the exclusive combination with the Mercedes Sprinter chassis.

Furniture architecture in "Chalet Rustico" or "Natural Heritage" interior design

↓ Example floor plan: PT 726 EF "Natural Heritage"

The plus points in the interior include: "Natural Heritage" interior in pine / walnut décor, spot lighting, free lines of sight for a spacious feel, cellar and underfloor heating in one: Heated double floor

Profila T MB – Floor plans

PT 696 EB

Total length:	7.12 m
Total width:	2.32 m
Weight class:	3.5 t
Number of seats:	4
Sleeping areas:	2/4 (optional)

- ✚ Single beds in the rear
- ✚ Large rear garage
- ✚ Ergonomically designed corner kitchen with 142-litre refrigerator
- ✚ Comfortable L-shaped seating group
- ✚ Bathroom with shower and swivel washbasin

PT 726 EB

Total length:	7.54 m
Total width:	2.32 m
Weight class:	3.5 t
Number of seats:	3 (4) (optional)
Sleeping areas:	2/4 (optional)

- ✚ Comfortable L-shaped seat bench with single seat on the passenger side
- ✚ Comfort kitchen with large refrigerator in individual arrangement
- ✚ Single beds in the rear
- ✚ Large rear garage
- ✚ Spacious bathroom with separate shower
- ✚ Washroom as separate dressing room variably closable on both sides with sliding doors

PT 726 EF

Total length:	7.44 m
Total width:	2.32 m
Weight class:	3.5 t
Seats:	3 (4) (optional)
Sleeping areas:	2/4 (optional)

- ✚ Comfort seating group with two-person sofas positioned opposite each other
- ✚ Table with folding top, height adjustable
- ✚ Single beds in the rear
- ✚ Large rear garage
- ✚ Spacious bathroom with separate shower
- ✚ Washroom as separate dressing room variably closable on both sides with sliding doors

PT 726 QF

Total length:	7.61 m
Total width:	2.32 m
Weight class:	3.5 t
Seats:	3 (4) (optional)
Sleeping areas:	2 (4) (optional)

- ✚ Comfort seating group with two-person sofas positioned opposite each other
- ✚ Table with folding top
- ✚ Central queen bed in the rear
- ✚ Bed with sliding slatted frame, adjustable headboard and linen compartment
- ✚ Large rear garage thanks to height-adjustable bed
- ✚ Washroom variably closable on both sides with sliding doors

[1]Technically permissible overall weight (kg) The technically permissible overall weight in a laden state refers to the overall weight defined by the manufacturer that the vehicle may not exceed when in drive mode.
[2]The weight in the ready-to-drive state (kg) The weight in the ready-to-drive state refers to the weight of the vehicle (with standard features according to the manufacturer's specifications) with its fuel tank filled to at least 90% of capacity and includes the weight of the driver (which is calculated at a nominal value of 75 kg), the weight of the fuel and fluids, the weight of the superstructure and the driver's cab, and the weight of the towing hitch and the tyre repair kit (to the extent these are present). This represents a calculated value that is subject to legally permissible fluctuations of up to ± 5% (see additional text in brackets). Since these legally permissible fluctuations impact the vehicle's payload and therefore also the weights of the packages and special equipment that can be ordered, the occurrence of such fluctuations must be factored into the configuration process and the choice of packages and special equipment.
[3]Permitted number of people with 3-point belts The weight of the passengers is calculated at a nominal 75 kg per seat, whereas the weight of the driver, which was already taken into account in the weight in the ready-to-drive state, must be deducted. In the case of a vehicle with four belt-restrained seats, the weight of the passengers is therefore 225 kg (3 x 75 kg).
[4]Maximum weights for packages and special equipment The maximum weights for packages and special equipment represent a value calculated for each floor plan with which we have restricted the weights for the packages and special equipment that can be ordered from the factory. This is intended to ensure that the legally prescribed minimum payload is complied with after the vehicle is shipped from the factory. If the configuration process leads to the upper limit for this defined by the manufacturer being exceeded as a result of the choice of packages and special equipment, you can only continue with the configuration process if you de-select packages, special equipment or belt-restrained seats or choose to increase the vehicle's load capacity. Otherwise, you will not be able to continue the configuration or order the configured vehicle. Please note that the calculation of the maximum weights for packages and special equipment also takes into account the special equipment features of the selected country variation / the selected special model.
[5]Fresh water tank size (l) Please note that the capacity of the fresh water tank is significantly reduced in the drive position. If the payload of the individual vehicle is sufficient, it can be filled to its full capacity.

Preliminary version

All-inclusive.

Whether it be ample storage space, weather protection thanks to a body made from GRP material, winter resistance and underfloor heating comfort thanks to heated double floors, insurance advantages or generous guarantees – we've thought of everything so that you can enjoy your holiday worry-free.

Quality and progress are hugely important at Eura Mobil.

Sealed Structure
The Eura Mobil principle of seal-vouched quality: a fully protected structure is built from a fully bonded, seamlessly sealed chassis with corrosion-resistant materials in the floor panel, walls and roof.

Withstands winter
To make the feel-good experience on trips and holiday independence perfect, all Eura Mobil motorhomes offer winter-proof on-board technology that is installed in a space-saving manner in the end-to-end double floor construction.

Fibreglass body
The GRP body makes Eura Mobil motorhomes the especially lightweight representatives of their class. GRP components offer the best long-term quality by providing for optimal protection against mechanical, chemical and weather-related influences.

Furniture construction
Did you know? The furniture of a large A-class model alone comprises almost 1,000 parts. This complex task calls for the furniture of our motorhomes to be designed using state-of-the-art CAD workstations.

Double floor
To offer you every kind of freedom, all Eura Mobil motor homes are suitable for use all year round and specially equipped for the "great escape".

Sleeping comfort
The comfortable beds and mattresses in your Eura Mobil are the product of our careful development work and your personal choice.

Kitchens
With the exclusive kitchens from Eura Mobil, you can also free yourself from the rigours of set mealtimes: Why not have breakfast on the beach again, or perhaps enjoy lunch in the mountains ...

Wellness
When days are full of adventure, new discoveries and new experiences, evenings are ideal for retreating into an oasis of calm in your motorhome. For relaxation and recuperation, for refreshment and enjoyment.

Preliminary version

Profila T "Freestyle"

highlights

- Base vehicle: MB Sprinter 317 CDI
- "Freestyle" furniture and feature configuration (with, among other things, new lightweight components in the kitchen, bathroom, doors, cupboards and cabinets)
- 80 Ah lithium battery
- Body with model-specific GRP panels
- ALDE hot water heating
- AL-KO low frame in weight-optimised special version
- 19.5-cm high heated double floor with floor storage compartments
- Elegant roof transition between driver's cab and body
- "Sun Roof" panoramic roof window, insulated and adjustable (optional)
- Large rear garage thanks to rear lowering with fully insulated underbody trough (726 EF)
- Winter-proof according to EN 1646-2
- Wood-free walls with continuous insulation (rot-proof)
- Furniture architecture in "Chalet Rustico" design (3-year guarantee)
- Bonded and all-round-sealed body composite made of hail-protected glass-fibre reinforced plastic (GRP) featuring Eura Mobil Sealed Structure Technology
- 10-year leak guarantee (up to 150,000 km)
- Water tanks heated and insulated in the double floor or in heated trough
- Electrically controlled waste water tank drainage
- Central technology compartment
- Noise-insulated window roller blinds (Seitz comfort roller blinds)
- Ambient lighting
- Illuminated entrance area with space for a TV of up to 32"
- Kitchen base unit with pull-outs
- Worktop illuminated from underneath for illumination of the kitchen pull-outs
- Comfort rain shower with back-lit shower column (depending on floor plan)
- USB port for charging mobile devices
- Seitz framed window flush with the external wall
- Body door with window and waste bin
- Mini Heki skylight over rear bed
- 16" wheels
- Exterior lighting over body door
- 230 V power socket in washroom
- Passenger airbag
- Textile wall covering around the rear windows

Preliminary version

Exclusive chassis
Mercedes Sprinter with AL-KO special frame as a basis for dynamic and comfortable handling

Spacious room layout
Both floor plans feature a face-to-face seating group, a spacious bathroom with a separate shower, large beds and plenty of storage space

Perfect body-mass index
Innovative material mix for the body and the furniture design results in a higher payload

Excellent open-area comfort in the 3.5 t class

Thanks to its exclusive chassis-body combination, and with its length of approximately 7.50 metres, the new "Freestyle" presents itself as a well-built and weight-optimised comfort tourer

A tailor-made balance between comfort and dynamic performance

↓ Example floor plan: PT 726 EF "Natural Heritage"

360° PANORAMA

A spacious room layout and a refined natural look are made possible even in the 3.5 t class thanks to the Freestyle features

Preliminary version

↓ Example floor plan: PT 726 EF "Natural Heritage"

Stylish atmosphere in the "Freestyle" bathroom.

Profila T MB "Freestyle" – Feature packages

Features and technical specifications for the **new Xtura models** will be announced at the Caravan Salon

10 YEARS LEAK GUARANTEE

3 YEARS FURNITURE CONSTRUCTION GUARANTEE

Xtura XT 686 EF

highlights

- Base vehicle: Mercedes-Benz with all-wheel drive
- Superstructure concept for long-distance travel and slopes
- Off-road and long-distance travel equipment
- All-season performance
- Electrical self-sufficiency for up to 30 days (depending on use)
- Body with raised floor clearance and optimised slope angle
- Modern interior offering superb travelling comfort
- Torsional stability and resistance to weathering and chemical influences
- Thermal insulation without cold bridges; long-lasting
- AT tyres and Delta wheels (optional)
- Roof rack system for cargo (optional)
- Exterior lighting (optional)
- ALDE heating technology for hot water and hot water underfloor heating
- "VICTRON" power supply system
- All on-board functions are integrated into the GARMIN Empir-Bus™ system
- GARMIN Tread- Overland (optional)
- Winter-proof according to EN 1646-2
- Wood-free walls with continuous insulation (rot-proof)
- Rear axle with 3 cm additional spring
- New furniture architecture in "Chalet Rustico" design (3-year guarantee)
- Bonded and all-round-sealed body composite made of hail-protected glass-fibre reinforced plastic (GRP) featuring Eura Mobil Sealed Structure Technology
- 10-year leak guarantee (up to 150,000 km)
- Water tanks heated and insulated
- Electrically controlled waste water tank drainage
- Noise-insulated window roller blinds (Seitz comfort roller blinds)
- Ambient lighting
- Illuminated entrance area with space for a TV of up to 32”
- Kitchen base unit with double-latched pull-outs
- Worktop illuminated from underneath for illumination of the kitchen pull-outs
- Washroom with swivel wall for integrated shower room
- Single-bed floor plan with adjustable bed frame and pull-out for conversion into a double bed
- USB port for charging mobile devices
- Anchor rail for rear garage
- Seitz framed window flush with the external wall
- Body door with window and waste bin
- Mini Heki skylight over rear bed
- LED exterior lighting over body door
- 230 V power socket in washroom
- Manual air conditioning system in the driver's cab

Go your own way!

With the new Xtura, you can discover practically endless possibilities for turning leisure time into mobile freedom.
The vehicle's 4x4 drive system ensures reliable acceleration, even in adverse road conditions. With its optional all-road tyres with an excellent grip, as well as a torsion-resistant superstructure, the Xtura is also able to conquer difficult terrain off the beaten track.

Inside the Xtura, you take your own world with you on your journey.

Xtura – Feature packages

All-inclusive

PREMIUM FEATURES "XTURA" INCLUDED IN THE STANDARD FEATURES:

Xperience line	Overland line **	Adventure line***
Fuel tank, 92 litre	All-terrain tyres with Delta rims	Garmin Tread all-terrain satnav
Electrically adjustable heated exterior mirrors	Roof rack with solar panels	Folding solar module
Electric roof fan	Rear wall support plate	Driver cab underfloor heating
Midi-Heki		
Mosquito screen for the body door		
Pre-cabling for solar power system		
Wet wiper system		
Smartphone integration incl. wireless charging		
Distronic active distance assistant		
Hinged lids for storage compartments		
Climatronic automatic air conditioning		
Traffic sign assistant		
Heated steering wheel		
Heated windscreen		
Seat heating		

Optional

Driving Assistance package*
Optional for: XTURA
High beam assistant
Fog lights
LED headlights

* in conjunction with Xperience line

** in addition to Xperience line

*** in addition to Overland Line or Xperience Line

[1]**Technically permissible overall weight (kg)** The technically permissible overall weight in a laden state refers to the overall weight defined by the manufacturer that the vehicle may not exceed when in drive mode.

[2]**The weight in the ready-to-drive state (kg)** The weight in the ready-to-drive state refers to the weight of the vehicle (with standard features according to the manufacturer's specifications) with its fuel tank filled to at least 90% of capacity and includes the weight of the driver (which is calculated at a nominal value of 75 kg), the weight of the fuel and fluids, the weight of the superstructure and the driver's cab, and the weight of the towing hitch and the tyre repair kit (to the extent these are present). This represents a calculated value that is subject to legally permissible fluctuations of up to ± 5% (see additional text in brackets). Since these legally permissible fluctuations impact the vehicle's payload and therefore also the weights of the packages and special equipment that can be ordered, the occurrence of such fluctuations must be factored into the configuration process and the choice of packages and special equipment.

[3]**Permitted number of people with 3-point belts** The weight of the passengers is calculated at a nominal 75 kg per seat, whereas the weight of the driver, which was already taken into account in the weight in the ready-to-drive state, must be deducted. In the case of a vehicle with four belt-restrained seats, the weight of the passengers is therefore 225 kg (3 x 75 kg).

[4]**Maximum weights for packages and special equipment** The maximum weights for packages and special equipment represent a value calculated for each floor plan with which we have restricted the weights for the packages and special equipment that can be ordered from the factory. This is intended to ensure that the legally prescribed minimum payload is complied with after the vehicle is shipped from the factory. If the configuration process leads to the upper limit for this defined by the manufacturer being exceeded as a result of the choice of packages and special equipment, you can only continue with the configuration process if you de-select packages, special equipment or belt-restrained seats or choose to increase the vehicle's load capacity. Otherwise, you will not be able to continue the configuration or order the configured vehicle. Please note that the calculation of the maximum weights for packages and special equipment also takes into account the special equipment features of the selected country variation / the selected special model.

[5]**Fresh water tank size (l)** Please note that the capacity of the fresh water tank is significantly reduced in the drive position. If the payload of the individual vehicle is sufficient, it can be filled to its full capacity.

Preliminary version

Original accessories for Eura Mobil Xtura

Application example
Base plate with spare wheel holder and spare wheel in combination with a rear ladder on the rail and a canopy

In cooperation with various manufacturers of accessories, we have put together a programme of accessories for our Xtura all-rounder that can be used to accommodate your personal preferences and whose components can be installed by your authorised dealer.

The foundation for the various possibilities here are the base plate at the rear of the Xtura and the roof rail that are installed at the factory. Different types of equipment components can be mounted on the base plate and also removed and replaced as desired.

The factory installed components

Base plate (rear)
Various types of mounting holes in numerous locations make it possible to attach different transport carriers and holders to the base plate.

Roof rail,
shown here in combination with solar panels, a roof-mounted air conditioning system and a roof rack.

Preliminary version

The accessory components

2 roof storage boxes,
mounted on the roof rack: The lockable and robust metal boxes with a moisture protection feature offer additional storage space outside the vehicle and can be accessed quickly using the rear ladder.

Base plate with **bike carrier** and rear ladder on the rail / back wall for up to three bikes.

Large rear storage box
on a mount on the base plate in combination with a rear ladder and rail – waterproof and lockable.

Universal mount
(here for levelling ramp) and **spare wheel holder**. Two stable bar supports and a central screw thread fastener reliably keep the spare wheel secure even when travelling on bumpy surfaces. Boxes, canisters and similar containers can be securely fastened to the universal mount.

Folding rear ladder,
lockable (shown here with a Delta spare wheel mounted on a lockable spare wheel holder)

Surfboard holder
with variable adjustment options on a universal carrier

Integra Line

highlights

- Automotive design
- "Short Cabin" visual concept with short front section for extra-wide field of vision
- Powerful LED main headlights (optional depending on equipment)
- LED tail lights
- Pilot's seats with arm rests and integrated seatbelts
- Electrically adjustable bus mirrors, heated
- Lift-up bed 193 x 150 cm in the driver's cab with 78 cm headroom
- 11-cm high heated double floor with floor storage compartments
- Convenient bed access thanks to wide, lowerable lift-up bed
- Large rear garages thanks to rear lowering with fully insulated underbody trough
- Winter-proof according to EN 1646-2
- Wood-free walls with continuous insulation (rot-proof)
- Robust furniture with aluminium profile reinforcements (3-year guarantee)
- Bonded and all-round-sealed body composite made of hail-protected glass-fibre reinforced plastic (GRP) featuring Eura Mobil Sealed Structure Technology
- 10-year leak guarantee (up to 150,000 km)
- Water tanks heated and insulated in the double floor or in heated trough
- Electrically controlled waste water tank drainage
- Central technology compartment
- ALDE hot water heating
- Dashboard and door trims in carbon look
- Ambient lighting
- 16" wheels
- ESP
- Mini Heki skylight over front section and rear bed
- Reading lights and orientation light in the driver's cab
- Noise-insulated window roller blinds
- Illuminated entrance area with storage facilities
- Kitchen base unit with pull-outs
- Worktop illuminated from underneath for illumination of the kitchen pull-outs
- Sink cover with 2-part chopping board (depending on floor plan)
- Comfort rain shower with back-lit shower column (depending on floor plan)
- Shower grate in the washroom
- Single-bed floor plans with adjustable bed frame and pull-out for conversion into a double bed
- USB ports for charging mobile devices
- Anchor rail for rear garage
- Seitz framed window flush with the external wall
- 80 Ah lithium-ion battery

Preliminary version

Rear garage
There's plenty of room for bulky luggage or bicycles in the lowered rear garage underneath the bed.

Practical box
On the passenger side in the driver's cab is a practical storage box for travel literature, chargers or other small items at hand. Naturally featuring Eura Mobil's typically stylish and stable characteristics in oak chalet finish.

The perfect choice!

The Integra Line represents the ideal combination of modern technology, attractive design and comfortable features. With its versatile range of layouts in the 7m class, it embodies a tailor-made premium motorhome with an excellent price-performance ratio, especially among the mid-size A-Class models.

In the living area, the fantastic spatial effect is inspirational.

↓ Example floor plan: IL 720 EF

The plus points in the interior include: A fantastic feeling of space despite a compact length, bathroom with huge, variable wardrobe, kitchen with hinged cover and retractable tap, swivel driver cab seats with integrated seatbelt and arm rest.

[1]Technically permissible overall weight (kg) The technically permissible overall weight in a laden state refers to the overall weight defined by the manufacturer that the vehicle may not exceed when in drive mode.

[2]The weight in the ready-to-drive state (kg) The weight in the ready-to-drive state refers to the weight of the vehicle (with standard features according to the manufacturer's specifications) with its fuel tank filled to at least 90% of capacity and includes the weight of the driver (which is calculated at a nominal value of 75 kg), the weight of the fuel and fluids, the weight of the superstructure and the driver's cab, and the weight of the towing hitch and the tyre repair kit (to the extent these are present). This represents a calculated value that is subject to legally permissible fluctuations of up to ± 5% (see additional text in brackets). Since these legally permissible fluctuations impact the vehicle's payload and therefore also the weights of the packages and special equipment that can be ordered, the occurrence of such fluctuations must be factored into the configuration process and the choice of packages and special equipment.

[3]Permitted number of people with 3-point belts The weight of the passengers is calculated at a nominal 75 kg per seat, whereas the weight of the driver, which was already taken into account in the weight in the ready-to-drive state, must be deducted. In the case of a vehicle with four belt-restrained seats, the weight of the passengers is therefore 225 kg (3 x 75 kg).

More information

Click here for more information on floor plans, upholstery, interiors and more ...

[4] **Maximum weights for packages and special equipment** The maximum weights for packages and special equipment represent a value calculated for each floor plan with which we have restricted the weights for the packages and special equipment that can be ordered from the factory. This is intended to ensure that the legally prescribed minimum payload is complied with after the vehicle is shipped from the factory. If the configuration process leads to the upper limit for this defined by the manufacturer being exceeded as a result of the choice of packages and special equipment, you can only continue with the configuration process if you de-select packages, special equipment or belt-restrained seats or choose to increase the vehicle's load capacity. Otherwise, you will not be able to continue the configuration or order the configured vehicle. Please note that the calculation of the maximum weights for packages and special equipment also takes into account the special equipment features of the selected country variation / the selected special model.

[5] **Fresh water tank size (l)** Please note that the capacity of the fresh water tank is significantly reduced in the drive position. If the payload of the individual vehicle is sufficient, it can be filled to its full capacity.

Preliminary version

Integra Line GT

highlights

- Mercedes Sprinter 415 CDI chassis
- Innovative cab geometry in accordance with the new GSR 2 standard
- Extensive safety and assistance system equipment
- Cameras for the latest assistance systems integrated into the windscreen and dashboard
- Sporty high-end RIM front section with dynamic highlighting of light brackets and air inlets
- Radiator with elegant matt metallic frame
- Body with mineral grey gel coat coating
- Bonnet and front mask with muscular bulges
- Extra deep special low frame for safe handling and maximum load volume
- 30-cm high heated double floor with floor storage compartments
- Standing height of 2.05m, external height 3.06m
- Moisture-protected storage tray accessible from both sides and from above
- Liner storage flaps that open upwards
- Automotive design
- "Short Cabin" visibility concept with short front section for extra wide field of vision
- Powerful twin headlights
- LED tail lights
- Pilot's seats with arm rests and integrated seatbelts
- Electrically adjustable bus mirrors, heated
- Lift-up bed 193 x 150 cm in the driver's cab with 78 cm headroom
- Convenient bed access thanks to wide, lowerable lift-up bed

- Comfort rain shower with back-lit shower column
- Single-bed floor plans with adjustable bed frame and pull-out for conversion into a double bed
- Anchor rail for rear garage

Preliminary version

More compact than a liner …

The new Integra Line GT defines its very own class in the A-Class segment. With a decidedly sporty design, and offering significant performance advantages over conventional premium A-Class vehicles on the one hand and significantly more compact dimensions compared to liners on the other hand, the GT sets its own individual standard of luxury and dynamic performance.

The Gran Turismo in the premier class

↓ Example floor plan: Integra Line GT 726 EF

… more than just an A-Class.

The dynamic, elegant design presents itself as the striking face of an athletic Gran Turismo, with an AL-KO STC special low frame that sets new performance attribute standards with a 30-cm double floor, 2.05m standing height and an exclusive interior. With vehicle lengths at around the 7.50 metre mark, the GT offers handling that is as simple as it is superior, and in this manner it remains decidedly light-footed as compared to other A-Class vehicles.

Preliminary version

More than just a highlight ahead of the rest

High-performance LED headlights light up the night. Now with an upgrade that enables an even greater range and more brightness.

Plenty of space to move around thanks to the table with a folding worktop and the face-to-face seating arrangement

Storage tray is accessible from both sides and from the interior. For loading the integrated Euro boxes or the moisture-protected floor trough.

Radiator grille with elegant metallic frame.

Liner storage flaps that open upwards for convenient loading and unloading.

Extra deep **special low frame** for safe handling and maximum load volume.

Modern **assistance and safety systems** for more comfort and safety.

Floor hatches allow access to the storage area in the double floor from the inside as well.

High-end RIM front section with dynamic highlighting of light brackets and air inlets.

Particularly large **load volume** thanks to double floor height of 30 cm.

Wide-opening, narrow bonnet with direct access to windscreen wash and oil top-up nozzles	S	S
Electrically adjustable bus mirrors, heated	S	S
Dashboard and door trims in carbon look	-	-
Lift-up bed with 78 cm seat height	S	S
Electrically controlled lift-up bed	O	O
Storage closets under the lift-up bed	S	S
Ambient lighting below the lift-up bed	S	S
Mini Heki skylight over lift-up bed	S	S
Driver's door with large storage compartments	S	S
Electric control panel within easy reach in the covered compartment on the passenger side	S	S
Electric window raiser for the driver's door	S	S
Extensive noise insulation	S	S
Driver's cab with automotive design	S	S
GRP front mask with headlight housings in RIM technology	S	S
Lowered radiator bridge for easy access to the engine compartment	S	S
Seat heating	S	S
Heated windscreen	S	S
Bonnet with gas spring assistance	S	S
Pilot's seats with arm rests and integrated seatbelts	S	S
Driver's cab door with double locking and central remote locking	S	S
Sliding windows for passenger side	S	S
Concertina darkening system for driver's cab	O	O
Electrically controlled front blinds	O	O
Card compartment with handy hinged lid on the passenger side	S	S
Reading lights and orientation light in the driver's cab	S	S

	Integra Line	Integra Line GT
SUPERSTRUCTURE		
Lightweight construction double floor insulated and heated throughout	S	S
Aluminium profile without cold bridges for floor-wall joint	S	S
Lightweight construction floor panel with aluminium inlay	S	S
Insulated wheel arches	S	S
Wood-free GRP walls	S	S
Double floor GRP-coated	S	S
Roof, wall, flooring made from GRP, fully insulated	S	S
Wall thickness of walls/roof/floor: 30/30/38 mm	S	S
Isofix, 2 x in driving direction	S (EF + QF models)	S
Isofix, 1 x in driving direction	S (except EF/QF models)	–
Roof edge profile made from powder-coated aluminium with joint sealing	S	S
Sturdy chassis side skirts made from aluminium	S	S
Electrically actuated step	-	-
Integrated double access step, insulated	S	S
Alde hot water heating	S	S
Duo control with remote display, de-icer and crash sensor	O	O
Service flaps with double seal, insulated inlay and self-closing locks	S	S
Extra-wide body door with window and waste bin	S	S
Wall units with aluminium profile reinforcement	S	S
Warm air circulation in double floor for underfloor heating effect	S	S
Exterior lighting over body door	S	S
Fresh and waste water tank in heated and insulated floor trough	S	S
Fresh and waste water tank in heated double floor	-	-
GRP rear wall with three-dimensional curving	S	S
Diffuser elements in black gel coat integrated into single-piece rear section	S	S
Additional, lowered side and floor storage compartments (depending on floor plan)	S	S
Extra-wide body door with window and waste bin	S	S
Lightweight upper floor	S	S
Double-moulded GRP sandwich roof	S	S
Garage lowering system with insulated well	S	S
Garage doors on the driver and passenger side	S	S
Anti-slip surface on garage floor	S	S
Mosquito screen for the body door	P	P
Heki skylight roof hood over seating group	P	P
Mini Heki skylight over rear bed	S	S
Mini Heki skylight over front section	S	S
Insulated Seitz framed window with mosquito screen flush with the external wall	S	S
Window roller blinds with noise insulation	S	S
Carpeted floor in the superstructure	O	O
Garage lowering system with insulated well	S	S

LIVING AREA		
"Chalet Rustico" interior	S	S
Upholstered fabric: Salento or Cremona	S	S
Table with 360° turning and sliding fixture	S	S
Living area with decorative elements (and wall pockets)	S	S
Stable slatted frames, with underneath ventilation	S	S
Noise insulation for wall unit doors	S	S
Ambient lighting	S	S
Wall unit profile made from aluminium with integrated stop attenuation for furniture doors	S	S
Compartment shelves in the upper floor with access from the interior	S	S
Rear bed in all QB models, height-adjustable	P	P
KITCHEN		
138 l to 153 l refrigerator (depending on floor plan)	S	S
Hob with electric ignition, glass cover and large work surface; number of burners 2	S	S
Drawers with metal roller runners	S	S
Extra-wide drawers with self-closing mechanism and soft-stop	S	S
Water tap with swivel non-drip outlet	S	S
Ergonomically shaped kitchen block	O	O
Oven	O	O
Extractor hood	O	O
WASHROOM		
Separate shower IL 720 QF, IL 730 EF, IL 720 EB	S	S
Storage closet and mirror	S	S
Cassette toilet with large roller-mounted tank	S	S
230 V power sockets	S	S
Bathroom with separate shower cubicle on the IL 720 EF, QF	S	S
Comfort rain shower with back-lit shower column (depending on floor plan)	S	S
Toilet room with mirrored cabinet and base unit	S	S
Window in toilet room (layout-dependent)	O	O
Door to sleeping area on IL 720, 730	S	S
WATER INSTALLATION		
Fresh water system made from Hartflex plastic	S	S
Fixed pipe system for service water / waste water	S	S
140 l insulated and heated fresh water tank in the double floor *	S	S
150 l insulated and heated fresh water tank in the double floor *	S	S
2 drainage valves for fresh water system	S	S
100 l waste water tank in insulated and heated floor trough	S	S
Electrically operated waste water tank emptying at the push of a button	S	S
Fittings with ceramic cartridges	S	S
Siphons to prevent odours	S	S

	Integra Line	Integra Line GT
ELECTRICAL INSTALLATION		
Electrical distributor panel easily accessible in the cover on the passenger seat	S	S
80 Ah gel battery	S	S
On-board control panel with separate displays for water, battery and charging voltage	S	S
LED reading spotlights with real glass	S	S
Light switch system with household logic system	S	S
LED ceiling light	S	S
Number of 230 V power sockets: 3	S	S
Number of 12 V power sockets: 1	S	S
21 A charger	S	S
USB charging ports in the living area and bedroom	S	S
TV preparation	S	S

All of the information in this brochure relates to the products listed herein and does not apply to any other products of Eura Mobil GmbH.
The models illustrated in this brochure show the features available in Germany. They may also contain special features and accessories that are not included with the standard scope of delivery.
Due to legal regulations, it is possible that the model variations and equipment features described here might be different in certain countries. Please ask your Eura Mobil dealer about the exact scope and available range of model-specific and model-neutral features. Subject to errors and changes in design, equipment and special features.
We work constantly to improve the quality of our vehicles, which is why we reserve the right to make changes to their features / optional features in this model year as well.
The latest current features, optional features and package contents can therefore only be viewed in the online configurator at www.euramobil.de.
With regard to installations and conversions, please note / comply with the manufacturer specifications and the legal provisions as defined in the German Road Traffic Licensing Regulations (StVZo) and the German Road Traffic Regulations (StVo).
The publication of this brochure renders all previous catalogues invalid.
